

About CBD

- CBD products are crafted from the Hemp plant.
- CBD has been known to reduce inflammation, eczema, arthritis pain, anxiety, and depression.
- Contraindications would only include pre-natal concerns, but any client that has concerns should always consult their physician before participating in a CBD spa service or the use of CBD products.

About LEEF Organics

- LEEF is 100% organic and non-GMO from seed to soil to the finished product. Everything is hand harvested and made in the USA.
- LEEF Organics' farming standards are the brain child of hard-working people who have honed their craft with premium standards and over 50 years of experience. Every product is tested for purity and potency against the most critical and wide array of standards.
- LEEF Organics crafts its products to range from 1,161 mg of CBD to as low as 84 mg and uses "whole plant CBD". Products contain only .0003 mg of THC which is far below the legal limit to have in a CBD oil.
- LEEF processes its products through cold pressing and fermenting, which is the very best way to craft these products. The single origin harvests are the cleanest form of CBD extract possible. LEEF does NOT add any chemicals, over-heat, or strip the plant as with other common extraction methods.
